To Whom It May Concern

It is with great pleasure that I recommend PCC Network Solutions.

As an Owner's representative I have had the pleasure to work with PCC for 2 years in the capacity of special system consultants and installers on one of my projects; a \$25,000,000.00 Skilled Nursing Facility.

Through the course of my project PCC has always displayed a high degree of integrity and responsibility. In addition to their excellent job site accomplishments, they have proven their leadership and the ability to go above and beyond when required by a demanding project schedule.

PCC's judgment and optimistic outlook ensure a logical and practical approach to their endeavors and any issues that arise within the course of construction.

I believe PCC would be an asset to any project needing special system installers or in the capacity of a special systems consultant. I am happy to give PCC my wholehearted endorsement.

Sincerely,

Howard Reno, Senior Project Manager
